

ASSEMBLY LOCATION DOCUMENT

For several years now, we have experienced phenomenal growth in regions like Africa, Eastern Europe, and South America. This has caused a shift of the majority of our members being from the Southeastern United States to the above listed areas. It would seem that we should have our Assemblies where the majority of our members could possibly attend the Assembly. Therefore, in light of our growth in the above areas, we recommend that the General Assembly be conducted occasionally outside the United States.
